

Part 1: Software Requirements Specification (SRS)

Project Name: Developer Portfolio & Client Acquisition Platform

Owner: Md Sahaduzzaman (Software Engineer)

Target Audience: Business Owners & Non-Technical Founders (Not just Recruiters)

1. Technical Architecture

- **Framework:** Next.js 14+ (App Router).
- **Styling:** Tailwind CSS (for rapid, responsive design).
- **UI Components:** Shadcn/UI (clean, professional look).
- **Content Management (Blog):** MDX (Markdown + JSX) stored locally. This allows you to write blogs in your IDE (VS Code) and push them via Git.
- **Animations:** Framer Motion (subtle animations to show "premium" quality).
- **Hosting Target:** Vercel (optimal for Next.js).

2. Functional Requirements (Page by Page)

Based on the guide:

- **A. Home / Hero Section:**
 - Must feature the "One Liner" value proposition.
 - CTAs: "View Case Studies" (Primary) and "Read the Blog" (Secondary).
 - Tech Stack Marquee: A scrolling bar showing icons (Docker, NestJS, Next.js, Stripe, Azure) to establish authority quickly.
- **B. About Page:**
 - Short professional bio emphasizing "Problem Solving" over just "Coding."
 - Integration of the "Education" section from the resume (BSc in CSE).
- **C. Portfolio / Case Studies:**
 - **Grid Layout:** Display projects (4j Traders, Rushkat, ODCP).
 - **Case Study Template:** Each project click must open a detailed view containing:
 - *The Challenge* (Business problem).
 - *The Solution* (Tech implemented).
 - *The Result* (Performance metrics/Business win).
 - **Links:** Buttons for "Live Demo" and "GitHub Repo."
- **D. Blog Section:**
 - Index page with categories (e.g., "Business Automation," "Performance," "Tech Explained").
 - Individual post page with syntax highlighting for code blocks.
 - **Conversion:** Every blog post must end with a "Hire Me" call-to-action block.
- **E. Contact / Hire Me:**
 - Functional contact form (Name, Email, Project Type, Budget Range).
 - Direct contact info (Email, Phone, LinkedIn) as per the guide.

3. Non-Functional Requirements

- **Performance:** Lighthouse score must be 90+ (Critical for a web developer portfolio).
- **SEO:** Dynamic OpenGraph images for social media sharing.
- **Responsive:** Mobile-first design.
